Forecast for Tuesday 26 Dec 2023

Weather: Cloud and outbreaks of snow soon clearing from the north in the early hours, then dry. Tuesday will be a dry day with some weak winter sunshine, high cloud will spill northeast later and make for flat light conditions.

Chance of cloud-free hill tops above 800m: 90%

Low Cloud and visibility: Very good visibility with great air clarity. Some patchy cloud between 800 and 1000 metres.

Met Office Aberdeen Meteorologist's View

Northwesterly winds will be strong at height first thing, and with low temperatures all day it will feel bitterly cold. Icy surfaces possible at lower elevations.

Forecast for Wednesday 27 Dec 2023

Weather: Widespread snow, heavy at times, will sweep northwards through the morning. Combined with easterly storm force winds this will lead to blizzard like conditions. Drier weather will spread northeast through the afternoon along with a few showers, but any snow confined to around 800 metres or so. A rise in freezing levels will lead to a thaw of some lying snow.

Maximum wind: Easterly 50 mph gust 70 mph in the morning, and possibly nearer to 90 mph across the higher tops of the southern Cairngorms. Winds easing in the afternoon and veering southwesterly 30 mph gust 50 mph in the afternoon.

Chance of cloud-free hill tops above 800m: Little chance for much of the day

Low Cloud and visibility: Very poor in snow, and in extensive low cloud down to 400 to 700 metres

Temperature: **Glens:** Minus 1 rising to 3 Celsius
At 800m: Minus 2 rising to 2 Celsius, falling back to 0 Celsius later
Freezing level: 400 metres, rising to 1000 to 1500 metres for a time in the afternoon, falling back to 800 metres in the evening
